

GIANT SPORTS TIMER

The Unipar Giant Sports Timer has been developed specifically by Unipar for sporting & promotional applications.

Powering the sign up with the button held in sets it to seconds otherwise it is automatically set to tenths of a second. It couldn't be simpler. Now the next time the button is pressed it starts the timer, press again & it stops the timer. The elapse time is now clearly displayed on the 270mm ultra-bright LED numerals. Press and hold the button to reset the display.

Housed in a slim impact resistant polycarbonate housing the numerals are clearly seen even on the brightest day. Should the weather take a turn for the worst no need to worry, the unit is waterproof.

Supplied with its own carry case complete with stand and rechargeable power pack the unit will give at least 8 hours continuous operation between charges.

The large impact resistant button is available in a variety of colours & is easily activated by even the smallest hands. The option of multiple buttons is also available if the stop button is needed elsewhere, for example at the end of an assault course.

The timer is a fun way to add a competitive edge to a training session. It is now being used by some of the top Rugby clubs as a serious training aid.
