

SpeedTrax Sports Sign

As an alternative to the larger Unipar Sports Speed Sign Unipar now offer the *SpeedTrax Sports Sign*, a smaller very compact system weighing less than 2 Kg but still giving the same high visual impact.

Supplied with a robust clip anywhere Radar antenna for automatic operation the sign is also fully compatible with the *SpeedTrax Sports Radar*, should the user wish to use it in handheld mode.

With many of the features of the *Speedtrax Sports Radar* the sign can readout in MPH or KPH. It is also able to display the first speed detected or the fastest, useful when using in a variety of sports.

The speeds are displayed on 270mm ultra-bright LED numerals. Housed in a slim impact resistant polycarbonate housing the numerals are clearly seen even on the brightest day. Should the weather take a turn for the worst no need to worry, the unit is waterproof.
