

**STANDARD FEATURES:**

Super Wide Angle Color Camera captures the entire scene without aiming

Super Bright LED Lights with a life expectancy of over 100,000 hours

Integrated Internal Microphone

2GB of on board non-volatile SD Memory provides up to 8 hours of recording (30fps). Non-volatile memory will retain video even if the batteries go dead

Up to 60 Seconds of Pre-Event Recording

Audio/Video Output allows playback of audio and video using any standard television, monitor, compatible desktop or laptop computer

Li-Ion Battery Pack provides up to 4.5 hours of continuous flashlight operation and up to 3.5 hours of continuous record time with the lights on. With the lights off it provides up to 8 hours of continuous record time.

Cables provided to charge in the car or in the department, download video and upload software

User Friendly Software for Easy Playback, File Management and Archiving to DVD's, CD-ROM's or Hard Drives

Software Upgradable to update to the latest features and enhancements in the future

*Every Digital Ally system comes complete with user-friendly software to allow playback, searching and retrieving video, annotating, file management and archiving.*

Playback using any standard TV or monitor. Can also be played back using Windows Media Player or other compatible software.

Password protection and proprietary digital signatures insure the data integrity and chain of custody. Supervisor settings and passwords provide complete control.

Search and retrieve video based on the following: Name, Text, Date/Time, Serial #, Notes and other customized parameters.

Burn individual events, multiple events or segments of events to DVD for easy playback in the department or court room.

Archive to DVD's, CD-ROM's, Hard Drives or Tape for short and long term storage solutions.

Add notes and annotations to video frames such as Offense, Drivers License #, Ticket #, Notes, Comments, Etc.

Save, print or email captured frames of video.

**UNLIMITED APPLICATIONS AND USES:**

- |                                 |                                    |
|---------------------------------|------------------------------------|
| Traffic Officers                | Security Officers                  |
| Patrol Officers                 | Training Officers                  |

# DIGITAL VIDEO SYSTEM INTEGRATED INTO A FLASHLIGHT

**PLAYBACK DIRECTLY FROM FLASHLIGHT:**

Playback audio and video using any standard television, monitor, compatible desktop or laptop computer. It offers all of the standard playback functions such as Play, Pause, Stop, Fast Forward and Fast Reverse.

**CHARGING / DOWNLOAD:**

USB 2.0 port allows easy, fast and secure downloading of video files. The unit can be charged inside the vehicle or in the department using the supplied cables.

**A GREAT ADDITION TO A DIGITAL ALLY IN-CAR VIDEO SYSTEM:**

Utilize the flashlight to record audio and video where your in-car video system cannot be used. Capture the evidence exactly where it is, hidden under the seat, in the trunk or in the house, etc. Playback audio and video directly on the Digital Ally Rear View Mirror digital video system.

Existing audio/video recording systems can be complicated and distracting to use in the field and require officers to carry or wear another piece of equipment. The ideal solution is to incorporate an audio/video recording system into something officers already have and use everyday.

**Evidence In The Palm Of Your Hand**

**A NEW GENERATION OF TECHNOLOGY**

The New Generation of Digital Video technology being utilized is so advanced and so small that the entire digital video and audio recording system is integrated into a high quality, water resistant machined aluminum law enforcement style flashlight. The size, shape and weight is the same as traditional flashlights.

**ADVANCED LED LIGHTING**

Utilizing the most advanced technology in LED lighting offers superior brightness and quality over conventional incandescent bulbs. They provide a reliable, efficient and super bright light with a life expectancy of 100,000 hours.

**EASY OPERATION**

The system is extremely easy to use and only requires one button to start and stop recording. There are no complicated controls or distracting displays to interfere with the officer's normal activities or compromise safety.

**RUGGED AND DURABLE SOLID STATE MEMORY**

Records directly to solid state memory to provide the most reliable medium for your evidence. Solid state offers no volatile moving parts like hard drives and other mediums.

**PERFORMANCE AND QUALITY**

Utilizing advanced MPEG 4 provides the highest quality and longest record times. Select from three different recording levels to provide from 2 to 8 hours.

**WIDE CAMERA VIEW**

Capture the entire scene with its extra wide field of view. With the wide angle view a monitor is not necessary for aiming, can be distracting and makes an officer easy to be seen at night.

**PRE-EVENT RECORDING**

Offers up to 60 seconds of pre-event recording. Capture the action before activating the record button.

**Point And Record Video And Audio Where Ever You Go**
